

Motion: The membership directs the association to take action on the following priorities.

## Priorities For New Management

1. Get the main weed gate back in service (FKRAD)
2. Install new breaker panel for boat ramp marina and equipment pad. The current panel is full. We have had proposals from Superior and Marathon Electric.
3. Run heavier electrical service to the blower & aeration equipment pad
4. Install 7.5 hp blower and VFD that was donated to SKHOA by member Dave Bumbaugh several years ago (FKRAD)
5. Hire labor to maintain seaweed barriers and aeration system (FKRAD)
6. Maintain & enhance flushing canals for Clean Water Act FKRAD compliance
7. Pump sludge out of Windy Point marina or clear it otherwise (FKRAD)
8. Track canal water quality meetings, grant funding, particularly for canal sludge removal, canal residents taxing plans and the progress on the FKRAD. Take necessary steps to avoid being taxed to pay for what we have already done at our own expense. Keep our board informed.
9. Tap Dr Bob's knowledge and technical expertise throughout.
